Annual Influenza Vaccination: Quick Reference Guide

We have a new measure within EQuIPP!

Annual Influenza Vaccination Rate

PQS is pleased to host this new immunization measure to continue providing pharmacies with actionable patient-level information.

Details you need to know:

- ✓ Measures the influenza vaccination rate for health plan patients 18 years or older
- ✓ Coordinates medical claims data with pharmacy data to calculate a performance score (to help account for your patients who may have already received the vaccination through their provider office)
- ✓ Members are attributed to your pharmacy based upon having the majority of prescription fills

Annual Influenza Vaccination measure will provide:

- ✓ Measurement period is August 1st – March 31st of the following year
- ✓ Performance score representing percentage of your patients that have received their annual flu shot
- ✓ Patient Outliers to target those who have yet to receive their flu shot

What to do with outliers?

- ✓ Assess patient status and history
- ✓ Contact and counsel patient
- ✓ Provide or refer patient for vaccination if deemed appropriate and accepted by patient

Log in today to check it out!

STEP #1- Click on Immunization Bar

The screenshot shows the 'Pharmacy Report' interface. At the top left, there is a 'Goal' dropdown menu set to 'Full Measure Set'. A blue arrow points to this dropdown with the text 'Goal can be set to any option from drop down choices'. Below the goal, there is a 'Print this Report' button. To the right, there is a 'HOW DO I IMPROVE?' button and a 'Performance Data Date Range' dropdown set to 'DEC 2016 - MAY 2017'. In the center, there is a 'View as:' section with three options: '6-Month Trend', 'Year-to-Date', and 'Immunization'. The 'Immunization' option is circled in blue. Below this is a table with columns: Measure, Trend, Pharmacy, Versus Goal, and Versus Others. The 'Influenza Immunization' row shows 50 patients, a 45.0% performance score, a 75% goal, and a 46.7% state average. There is a checkmark icon and an 'OUTLIERS' button next to the state average.

Measure	Trend	Pharmacy		Versus Goal		Versus Others
		# of Patients	Performance Score	Goal	Gap	State Average
Influenza Immunization		50	45.0%	75%	✓	46.7%
