

# Target Your Members AND Their Disease States

You can leverage our pharmacy network to improve member satisfaction and reduce overall member cost.

Medication Quality Metrics – Improve adherence and lower member spend

## Diabetes

- On average, members with diabetes have medical expenditures approximately 2.3 times higher than what expenditures would be in the absence of diabetes.

<https://www.diabetes.org/resources/statistics/cost-diabetes>

## Hypertension

- Members with high blood pressure are estimated to encounter nearly \$2000 higher annual healthcare expenditure compared with their non-hypertensive peers.

<https://doi.org/10.1161/JAHA.118.008731>

## Hyperlipidemia

- 71 million U.S. adults have high LDL cholesterol. Nearly 2 out of 3 adults with high LDL cholesterol don't have their condition under control.

%

95

Percent of all Pharmacies

Over nine out of ten of all pharmacies are connected to EQuIPP®.

60

Million Lives

Data for nearly 60 million lives across Medicare, Medicaid and commercial lines of business are managed within the EQuIPP® platform.

42

Million Patients

Over 42 million patients are in a performance based program managed by pharmacists.

%

90

Percent of Medicare Lives

Nine out of ten Medicare lives are hosted in EQuIPP®.

## No Limits

**Although we target the core three adherence measures with our past examples, PQS hosts measures touching many disease states from credible measure stewards such as PQA or NCQA.**

**Asthma**

- Asthma Medication Ratio
- Medication Management in Persons with Asthma

**Diabetes Care**

- A1c Measures
  - A1c Test Complete
  - A1c Under Control
- Retinal Eye Exam
- Statin Use in Diabetes

**Behavioral Health**

- Antidepressant Medication Management
- Adherence to Antipsychotics
- Antipsychotic use in Adolescents

**Specialty**

- Adherence to Multiple Sclerosis Medication
- Hep-C Completion of Therapy
- Antiretroviral Adherence

**Opioid Use**

- Concurrent Use of Opioids and Benzodiazepines
- Use of Opioids at High Dose

**Vaccination**

- Influenza Vaccination Rate
- Pneumonia Vaccination Status for Adults
- COVID-19 Vaccination Rate (Coming Soon!)

**Custom Measures**

- Certain disease states or areas of importance for your health plan?
- PQS can create custom measures that are clinically relevant.
